

Copper Products

We are a celebrated **Copper Products** Supplier and Distributor from India, having a wide network that makes premium Copper Products easily available in the market. Our comprehensive range of Copper Products is admired by clients for its structural strength and long functional life. This is due to the fact that we source the Copper Products from the best vendors and then conduct stringent quality checks to assure their quality. This range can be easily customized as per the specific demands of clients.

Our Range :

- Copper Sheets and Plates
- Copper Strips and Foils
- Copper Rods
- Copper Flats
- Copper Wires

Copper Sheets and Plates

We offer a vast assortment of **Copper Sheets and Plates**, which consists of much variety in terms of Copper grades used in their manufacture, sizes and shapes. Certified for their quality and procured from credible vendors in the market, the complete range of Copper Sheets and Plates is made available at attractive prices in the industry.

Range :

- **ASTM A210 Grade** : A-1 ASTM A106, Grades A, B, C ASTM A333, ASTM A179, ASTM A53A & B Grades 6 with IBR Test Certificates in the form of IIIA/IIIB & Non-IBR etc.

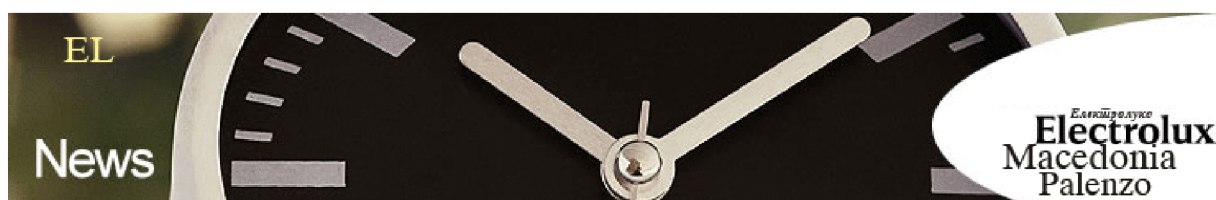

Standard Nominal English Sizes :

- 1/8"
- 1/4"
- 3/8"
- 1/2"
- 3/4"

Metric Sizes :

- 10mm
- 10mm - 20mm

- 20mm - 30mm
- 30mm - 40mm
- 40mm - 50mm

Specialty :

- Certified by experts
- High tolerance capacity
- Smooth finishing
- Shock resistant
- Uniform mechanical property
- Affordable range

Apt for :

- Sculpture making
- Home décor
- Garden décor

<u>Specifications :</u>	
Width	From : 300mm up to 1250mm
Length	From : 1250mm up to 2500
Thickness	From : 0.3 up to 8mm and above

Copper Strips and Foils

We offer an exclusive array of **Copper Strips and Foils** that are highly demanded in the construction sector. Designed as per industrial standards, our Copper Strips and Foils are made from superior quality copper by manufacturers using high standards of production. Various features are incorporated in the Copper Strips and Foils, making them deliver the performance that clients expect.

Key Attributes :

- Hard wearing
- Good tensile strength
- Resistant to heat and abrasion
- Resistant to chemicals
- Resistant to corrosion
- Fine finishing

Applications :

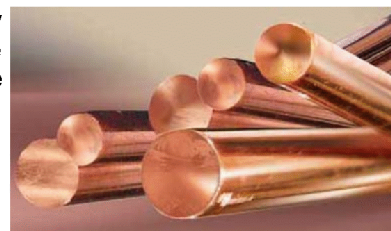

- Radiator
- Electrical

<u>Specifications :</u>	
Minimum Thickness	0.05 mm
Minimum Width	06 mm
Maximum Width	250 mm
<u>Specifications of Copper Strip :</u>	
Width	From : 12mm up to 50mm
Thickness	From : 1.6mm up to 6mm
Length	In Coil form

Copper Rods

We provide a wide range of **Copper Rods**, which is repeatedly demanded by clients for its high quality. Our Copper Round Rods are used for diverse applications across many different industries. Affordability and quality are the factors kept in mind by us while delivering the Copper Rods in the market.

Availability :

- **Grades**
 - FHRC
 - Electrolytic
 - Commercial
- **Size of Gauges**
 - 0 swg to 40 swg

Special Features :

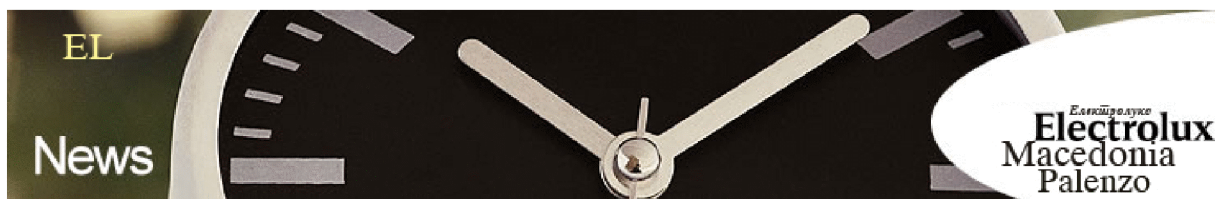

- High heat resistance
- Dimensional accuracy
- Durable
- Good chemical resistance
- Made from high grade copper

Applications :

- Electrolytic Applications
- Anodes
- Electrolytic Applications
- Construction

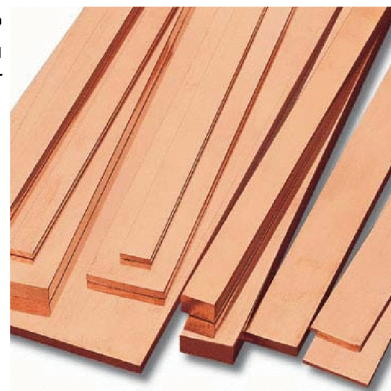

Specifications :

Diameter	From : 8mm up to 100mm
Length	10ft to 16ft

Copper Flats

We bring forth a range of **Copper Flats** in varying sizes and dimensions to cater to the demand of the engineering and construction industries. Made from high quality Copper, our Copper Flats are provided to the clients as per their specifications.

Specialty :

- High thermal conductivity
- Corrosion resistant
- Long lasting
- Good electrical conductivity
- Dimensional stability

Applications :

- Transformers
- Rectifiers
- Furnace
- Heavy electrical engineering
- Control panels
- Electrical Engineering Components
- Anodes

Specifications :

Width	From : 25mm up to 150mm and above
Length	From : 6mm up to 16mm and above

Copper Wires

We are a leading Supplier and Distributor of **Copper Wires** in the national and international markets. Procured from renowned manufacturers, our Copper Flats have established a prominent place for themselves in the market, owing to their superior quality. We stock bulk quantities of these Copper Electrical Wires that are offered in the market at competitive prices for the clients.

Attributes :

- High temperature tolerance
- Good electrical conductivity
- Resistance to wear and tear
- Rust proof
- Long lasting structure

Applications :

- Panel Boards
- Electrical Engineering Components
- Earthing
- Artificial Imitation Jewellery
- Electrification Lines

<u>Specifications :</u>	
Thickness	0.3mm up to 8mm
Available	In coil form
